A large portion of the spare parts (FAK) for System 4 was delivered from Production stock to be packed for shipment to your location. A list is enclosed that consists of items delivered from Production stock that did not appear on the shipping documents to your location. It is believed that these items were shipped and are on hand at your location. Please survey your FAK. If you can locate any of these items, check the quantity on hand against the shipping document and have the supply officer acknowledge receipt of the balance. Have this receipt returned to the factory.

In some cases, the quantity shown on the enclosure will be less than on hand. The quantity on the shipping document plus the quantity on the enclosure should total and equal the quantity on hand. The list includes eighteen items. There are only four of these items that really concern us. These are:

MP-11641	Power Supply
MP-11607	High Voltage Section
MP-10970	Reel Assembly
MP-40144	Magnetic Tape
